

## **CONFIDENTIALITY DECLARATION**

**Project:** Develop a Software Program for Your Company Using Python

**Student:** Euris Garcia

**Date:** January 2026

I, the undersigned, Euris Garcia, hereby declare that:

1. All information, examples, screenshots, and identifiers used in this project have been reviewed to avoid disclosure of any confidential information belonging to my employer, customers, partners, or any third party.
2. The application “AMI Patch Evidence Tracker (Synthetic Data)” has been intentionally designed to operate ONLY on synthetic, fake-but-realistic data. It does not connect to any real DEV, STAGE, or PROD environment or to any production tools, such as vulnerability scanners, ticketing systems, or monitoring platforms.
3. All CVEs, plugin IDs, hostnames, AMI IDs, IP addresses, and environment names referenced in the application, documentation, and deliverables are synthetic labels used exclusively for educational and demonstration purposes.
4. No proprietary source code, internal processes, architecture diagrams, or non-public documentation from my employer or any third party have been copied into this project.

5. I understand that I remain responsible for respecting all confidentiality and data protection obligations that apply to my professional environment and that this project must not be used as a vehicle to disclose sensitive or restricted information.

**Signed:** Euris Garcia

**Date:** 01/21/2026
